Work at the AI4Business Lab as a Student Assistant!

Are you passionate about AI, business, and innovation? Are you flexible, independent and looking for a part-time job? We're looking for a proactive student assistant to support the development of the AI4Business Lab. In this role, you will:

✓ Assist in growing the lab and shaping its initiatives
✓ Help build and maintain partnerships with industry leaders
✓ Work on exciting data-driven projects in collaboration with business
This is a great opportunity to gain hands-on experience in AI applications and business collaborations.

Requirements
- Current BSc 1st or 2nd year student in Business Analytics/related field.
- Interest in Business Analytics and AI
- Available 8 hours a week from April-May 2025.
- Flexible and Independent
- Commercial and pro-active mindset
- Willingness to work individually and in a small team

Job Information
- The AI4Business lab is a centre focused on organising collaborative data science projects with corporate partners. Collaborations include business analytics thesis projects, research collaborations, and events.
- Tasks include: project management, student communication, project supervision, benchmarking, website content creating, creating material, building an agentic AI to automate the lab's processes.
- 8 hours per week, April/May 2025 until spring 2026 – hours are flexible.
- You will be working with Inez Zwetsloot at the Amsterdam Business School.
